	P. Trail Closure	
	Q. Area Closure	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: Fire growth is expected as unburn areas within containments lines are being burned out. Several different areas have been identified for burnout.

24 hours: Fire growth is expected to continue as burnout is done in Division Alpha and Whiskey.

48 hours: No expected fire growth.
72 hours: No expected fire growth.

Anticipated after 72 hours: No expected fire growth.

37. Strategic Objectives (define planned end-state for incident):

Keep fire small to control costs of the fire by using direct attack. Protect natural resources especially commercial forest lands that are ready to be harvested.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

20 single family residences are currently under level 2 evacuations.

12 hours: 7 single family residences are currently under level 1 evacuations. Level 2 evacuations is for homes adjacent to the burnout areas.

20 single family residences are currently under level 2 evacuations.

24 hours: 7 single family residences are currently under level 1 evacuations. Level 2 evacuations is for homes adjacent to the burnout areas.

48 hours: 27 single family residences are currently under level 1 evacuations.

72 hours: 27 single family residences are currently under level 1 evacuations.

Anticipated after 72 hours: 27 single family residences are currently under level 1 evacuations.

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: None

24 hours: None

48 hours: Two type 2 hand crews. Current crews will time out and need to be replaced.

72 hours: Two type 2 hand crews. Current crews will time out and need to be replaced.

Anticipated after 72 hours: None

Incident: NINE MINE

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
 - 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

North area of fire is in steep rock ground with stringers of vegtation that can carry fire to the top where the fire can spread rapidly. This area had containment lines built around in and started to naturally burn. Crews are conducting burnout in this area to create black line against natural and man made barriers.

41. Planned Actions for Next Operational Period:

Mop up will continue in Division A and W, with mop up also starting in recent area that was burned out. Division Z is in a patrol status.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"): 200
- 43. Anticipated Incident Containment or Completion Date: 08/18/2021
- 44. Projected Significant Resource Demobilization Start Date: 08/18/2021
- 45. Estimated Incident Costs to Date: \$966,153.99
- 46. Projected Final Incident Cost Estimate: \$1,600,000.00
- 47. Remarks (or continuation of any blocks above list block number in notation):

Air costs for the fire are estimated costs.

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
