33. Life, Safety, and Health Status/Threat Remarks:

**Currently 27 homes and 45 outbuildings are currently at risk and are still at level 1 evacuation.**

**Hand crew that was quarantined at base camp has moved to a hotel to continue their quarantine until they return to their home unit.**

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

**The temperatures reached mid 90's today, with a significant drop in RH. Winds have also picked up and switch directions coming from the NE.**

34. Life, Safety, and Health Threat Management:

	Active?
A. No Likely Threat	
B. Potential Future Threat	X
C. Mass Notifications in Progress	
D. Mass Notifications Completed	
E. No Evacuation(s) Imminent	
F. Planning for Evacuation

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Fire growth is expected but not rapid due to current weather conditions. The north part of the fire is also currently being kept in check by a steep rock slopes, but there are stringers of vegetation that in the future will carry fire to the top to where homes are under a level 1 evacuation. Crews are going direct with this area, constructing handline. Burnout operations will take place which may increase size of fire.**

24 hours: **Fire growth is expected but not rapid due to current weather conditions. The north part of the fire is also currently being kept in check by a steep rock slopes, but there are stringers of vegetation that in the future will carry fire to the top to where homes are under a level 1 evacuation. Crews are expected to complete hand trail on the north side of the fire. Burnout operations will take place which may increase size of fire.**

48 hours: **No expected fire growth.**

72 hours: **No expected fire growth.**

Anticipated after 72 hours: **No expected fire growth.**

37. Strategic Objectives (define planned end-state for incident):  
**Keep fire small to control costs of the fire by using direct attack. Protect natural resources especially commercial forest lands that are ready to be harvested.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **27 single family residences are currently under level 1 evacuations.**

24 hours: **27 single family residences are currently under level 1 evacuations.**

48 hours: **27 single family residences are currently under level 1 evacuations.**

72 hours: **27 single family residences are currently under level 1 evacuations.**

Anticipated after 72 hours: **No threat to residences**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **None**

24 hours: **None**

48 hours: **None**

## Incident Status Summary (ICS-209)

Incident: **NINE MINE**

72 hours: **None**

Anticipated after 72 hours: **None**

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:  
 1) critical resource needs identified above,  
 2) the Incident Action Plan and management objectives and targets,  
 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

**North area of fire is in steep rock ground with stringers of vegetation that can carry fire to the top where the fire can spread rapidly. Progress was made using direct attack with hand crews. More work will be needed to insure the lines will hold.**

41. Planned Actions for Next Operational Period:

**Type 2 crews will complete handline on the north side of the fire connecting Div A and Div W. This will ensure a complete fire trail around the fire.**

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): **200**

43. Anticipated Incident Containment or Completion Date: **08/15/2021**

44. Projected Significant Resource Demobilization Start Date: **08/15/2021**

45. Estimated Incident Costs to Date: **\$672,566.00**

46. Projected Final Incident Cost Estimate: **\$1,200,000.00**

47. Remarks (or continuation of any blocks above – list block number in notation):

**Estimated costs are with some estimated air resources.**

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
